This neighborhood scale monitoring site was installed in January of 2009. The site continuously monitors PM<sub>2.5</sub> to provide data for population exposure assessment in the Bozeman area, and it also provides real-time data for DEQ's [Today's Air](#) website. This site replaced the Bozeman Wastewater Treatment Plant PM<sub>2.5</sub> site which was lost in the fall of 2008 due to construction activities for expansion of the plant.
